Hi Lisa & Al,

Below is some community input on the stage and fountain placement in the downtown plan.

Thanks,

**Amy Newby**

Parks and Recreation Director

Hi Amy,  
Appreciate all the work done on the downtown plan! Looks really nice.  
I realize I should have voiced this sooner but better to at least share now.  
The stage is perfectly placed at the intersection of Harrington park and the main plaza. The water feature opposite seems like a hindrance when there are performers- such as at holiday event and wine and art.  
It restricts the audience from being in front of the stage. This past holiday there were folks packed around the stage for nearly all the performances.

Perhaps the water fountain can be relocated? With draughts, minimizing it makes sense to me. The lovely water fountain in the back of city hall is never used anymore and looks sad.

Thank you,  
Jacki Yahn
